# cPanel / WHM: The Best Multi-Domain WHM Hosting

## Hosting Automation Platform

With Mumbai Hosting's Multi-Domain WHM Hosting, you can host multiple domains under your account. You will also get a MASTER Control Panel (WHM) to manage all your domains from a single control panel.

WHM gives you total control and flexibility for managing many domains on a single hosting service or server. WHM lets you create and manage multiple cPanel domains and provides full server stats, analytics, and DNS management. You can set up email accounts, host multiple websites, and allocate disk space and bandwidth quotas separately.

## White Label Multi-Domain WHM Hosting Plans

### With Private Nameservers

Our **Multi Domain Hosting Plans** are designed for businesses and professionals who need to manage multiple websites under one powerful hosting solution. Each domain comes with its own separate cPanel account, ensuring better security, resource isolation, and easier management compared to traditional addon domains.

You can manage all websites through a centralized WHM interface while keeping each account fully independent. This setup is ideal for agencies, developers, and businesses handling multiple brands or projects. Every website benefits from SSD-powered performance, the latest PHP versions, and built-in email hosting.

A free DV SSL certificate is included for every domain you host, keeping all your websites secure at no extra cost. With reliable technical support for setup, migrations, and daily management, you get a smooth and scalable hosting experience.

## cPanel Email Features

 POP3 / IMAP - Mobile Access

 Email Forwarding

 Auto Responders

 Webmail - Roundcube

 Spam Assassin

 Import Addresses/Forwarders

## cPanel Website Features

 cPanel Management

 File Manager

 FTP Manager
